Atomos Technology

Kolkata, West Bengal

- Reviewed the existing **Flutter** project and built new features for it using **Dart**.
- Rebuilt the front-end for the official website of Atomos Technologies using **Next.js** and **TypeScript**, resulting in improved **performance and speed**.
- Deployed several **PHP** projects on **Hostinger with phpMyAdmin**.

Projects

- BlockFI** | *NextJS, Tailwind CSS, EthersJS, NodeJS, Solidity, Metamask* | **Github** June 2024
 - Designed and developed features for a **Decentralized Finance** platform leveraging blockchain technology.
 - Facilitated peer-to-peer financial services like lending, borrowing, and trading through smart contracts written in **Solidity**.
 - Utilized stablecoins to minimize market volatility and enhance user experience within the DeFi ecosystem.
- Pix-Mender** | *ReactJS, Express JS, Node JS, JavaScript, CSS, Firebase* | **Github** February 2024
 - Developed a web application using **ReactJS, Express JS, Node JS, JavaScript, CSS, and Firebase** that streamlines the process of uploading IDs, photos, and signatures to admission portals.
 - Implemented a user-friendly interface where users can upload their documents all in one place. The application automatically categorizes and stores these documents in a **Firebase** database, organizing them into separate folders for photos, signatures, and ID documents.
